

RECYCLING

SHAPING TOMORROW.

SERVICES

Delta Group diverts more than 4m tonnes of construction waste from landfill every year with over 90% recycled and reused as 21st Century building materials on project sites around the world.

We can design and deliver turnkey waste management solutions to satisfy commercial and industrial project needs, including materials tracking management and reporting systems and a fleet of licensed transport vehicles and specialist crushing, screening and recycling plant.

+ Concrete Recycling

Purpose built off-site facilities and primary, secondary and tertiary mobile contract crushing and screening plants can be deployed to produce premium grade concrete and sealing aggregates for civil construction and infrastructure projects. A mobile pug mill can also produce site specific blended, wet mix or cement treated materials.

+ Timber Recycling

We specialise in furniture grade Australian hardwood products, including benchtops, post and beams, rough sawn or dressed treated pine (DAR) and decking, and recycled or re-machined tongue and grooved (T&G) timber flooring. Custom machining and furniture design. Exclusive distributor of premium 'Hydrowood' products from Tasmania.

+ Commercial Bin Hire

Our customised batch-processing and collection services coordinate the movement of EPA licensed waste transport operations, including 6-32 cubic metre Hook and Craneable Skip Bins for residential and commercial projects as well as high rise construction and demolition works.

+ Waste Transfer Stations

We separate building and construction waste to reduce waste to landfill by recycling and reusing as much waste as possible and operate a dedicated Waste Transfer Station in Port Melbourne, less than 5km from Melbourne CBD. We are also accredited under the Green Star environmental rating and credit programme.

+ Clean Fill Sites

We can provide commercial waste management services for non-contaminated soils and EPA approved clean fill materials and operate our own purpose built facility at Heatherton in suburban Melbourne.

+ Scrap Steel Recycling

We separate and recycle scrap steel, copper, brass, aluminium – including 70:30 stainless, ferrous, gun metal, clip rock, corrugated, angle, pipe, rolled joists, TFC, PFC and UB waste materials.

+ Asset Recovery & Salvage

Commercial and industrial demolition works, including plant decommissioning and dismantling, materials separation and plant or equipment resale.

+ Transport & Logistics

Delta Group operates the largest fleet of specialised plant and equipment in Australia. Our purpose-built fleet is regularly upgraded and meticulously maintained. We also employ in-house logistical systems, including licensed transport and accredited waste materials management and reporting. Our capacity to invest capital expenditure in new plant and equipment gives us the flexibility to meet any client or project requirement.

+ Specialist & Integrated Services

In-house fabrication workshop, quarry operations and management, carbon abatement planning and contracting, marine based project management expertise, closure studies and plans, and disaster or emergency response operations.

+ People

We refuse to accept anything but the very best we can give to a client and their project. We are fiercely proud of our success but we won't rest on our laurels. Nor will we get ahead of ourselves because our willingness to learn and improve is our trademark. It's why we've forged a reputation as a pioneer and trusted standard bearer of unparalleled safety, integrity, teamwork and excellence.

PRODUCTS

Where others saw mountains of landfill, we saw building and construction materials of the future. We were one of the first contractors of our type in the world to diversify into waste management and recycling through our own Waste Transfer Station and Cleanfill facilities in suburban Melbourne. It's also why we teamed up with Boral Limited in 2000 to create a ground breaking new by-product of construction waste – Envirocrete – as well as establishing a dedicated timber recycling division.

INPUTS

- + Scrap Steel
- + Timber
- + Concrete
- + Asphalt
- + Bricks
- + Excavation Rock
- + Masonry

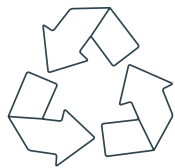

DELTA RECYCLING SERVICES

- + Waste Transfer Station & Cleanfill

+ Mobile Contract Crushing & Screening
- + Mobile Pug Mill

+ Licensed Removal & Transport Logistics
- + Specialist Construction

+ Commercial Bins

OUTPUTS

- + Envirocrete & Envirobase

+ Crushed Brick

+ Custom Aggregates

+ Drainage Aggregates

+ Hard Rock Aggregate & Dust
- + Hardwood Posts & Beams

+ Hardwood Decking & Flooring

+ Furniture Grade Hardwood

+ Custom Machining & Furniture Design
- + Excavation Rock Rubbles

+ Asset Recovery & Salvage

+ Wet Mix & Concrete Blends

We take great pride and care in developing safe, reliable and flexible waste management and recycling solutions that help our clients achieve their sustainability aims as well as to fulfil their environmental responsibilities.

Delta Group sites operate under approved conditions which maintain the highest level of quality control for incoming material, reprocessing and finished product sales. On site NATA accredited laboratories test all products to Australian Standards.

+ Commercial Bins

6-32 cubic metre Hook and Craneable Skip Bins.

+ Envirocrete

Crushed concrete blended with varying percentages of crushed brick to specification. A high quality specification material with low plasticity index, high workability and compaction. Commonly used for road base, sub-base, hard stands, pavements and capping material. VicRoads Approved (Spec 820/821). 20mm minus crushed concrete:

- Class 2, 3 and 4
- Wet Mix - up to 12.5%
- Cement Treated - up to 6%

+ Envirobase

Crushed brick and mixed brick/concrete. A highly workable and compactable material that is ideal for site access roads, haul roads and stabilisation, pavement sub-base, backfill and commercial site works. VicRoads Approved. 20mm minus crushed concrete:

- Wet Mix - up to 12.5%
- Cement Treated - up to 6%

+ Crushed Rock Material & Excavation Rubble

Crushed brick and mixed brick/concrete. Virgin material generally consisting of regional Victoria basalt. VicRoads Approved (Spec 812). 80mm minus excavation rubble and 20mm/40mm minus crushed rock:

- Class 2, 3 and 4
- Wet Mix - up to 12.5%
- Cement Treated - up to 6%

+ Dust

Screened fines from crushed brick and excavation rock that is used for pipe bedding, under slab preparation, and under pavers:

- 7mm minus Brick dust
- 5mm minus Rock dust

+ Drainage Aggregate

Screened single and graded aggregate - 20mm to 7mm – used for spoon and swale drains as well as agriculture piping and drains.

+ Concrete & Sealing Aggregates

A selection of asphalt/soft rock crushing and screening. Choice of 20mm, 14/10 or 7mm aggregate as well as dust.

+ Timber

Wall Cladding;
Internal and Exterior

Hardwood Flooring & Decking;
Tongue & Grooved and DAR

Custom Designed Furniture;
Cabinetry, tables, benches, chairs, metal frames, home/kitchen wares

Architectural Beams & Posts;
100mm x 100mm up to 450mm x 450mm

Hydrowood;
Huon Pine, Western Beech, Sassafras, Blackwood, Oak, Celery Top Pine.

DELTA GROUP

Delta Group is one of the largest diversified contractors of its type in the world today.

With 40 years of experience, over 680 staff and a fleet of more than 888 specialised plant and equipment, we have the financial, organisational and operational capacity to manage hundreds of projects at any one time - Australia wide.

We offer single source project solutions involving civil and demolition works, recycling and hazardous waste removal, environmental management services, plant and equipment transport logistics and rental, and specialist design or construction.

We have the scale and systems to maximise value for our clients and can synchronise our services, personnel and plant to meet the demands of any project in any location – metro, regional, remote or marine.

We are respected for a bold, innovative approach that is built on trust, integrity and teamwork. We are a genuine partner for our clients and enjoy delivering value to each project. It's why we have such an enviable track record of success and how we continue to shape the urban and industrial landscapes of tomorrow.

+ Safety First

Nothing matters more to us than safety. It is our most important business practice and we demand visible leadership at every stage of a project and from everyone involved. Our triple certified integrated QSE management systems have been proven over thousands of projects in high risk environments, allowing us to continuously improve our practices and to build upon our reputation as best-in-class.

+ Risk Management

When you operate in high risk environments across multiple and complex legislative or regulatory frameworks, it is imperative we maintain the relevant corporate and individual licences to complete our work safely and to the standards our clients and communities expect. We also maintain comprehensive liability insurance and professional indemnity cover in strict accordance with best practice risk management and corporate governance protocols.

+ Above & Beyond

Combined, our senior management and divisional management team represent more than 230 years of experience with Delta Group alone. Our clients don't just benefit from our integrated project solutions and proven management systems, they benefit from a culture of collaboration and innovation that - when combined with the latest software and hardware solutions - allow our people to make the most of their remarkable skills and experience.

+ Stakeholder Management

We pride ourselves on our ability to effectively manage diverse stakeholder groups and to carry out complex and challenging civil works in high density, congested environments without disruption to residential amenity or ambience, public infrastructure and essential services, or commercial business operations. Our emissions, noise and vibration control measures are second to none, while our transport logistics and traffic management capability is equally impressive.
